Volume 44—2010
Subject Index

A priori optimization: 125
Adaptive large neighbourhood search: 125
Air traffic management: 1
Airlines: 15
Alliances: 15
Approximate dynamic programming: 38
Automated stacking cranes: 169
Automatic vehicle identification counts: 254
Aviation security: 333
B-spline: 537
Branch-and-price: 98, 415
Break scheduling: 442
CARP: 206
Calibration of traffic simulation software: 151
Capacitated arc-routing problem: 125, 206
Capacity constraints: 307
Car-following models: 151
Column generation: 382, 415, 493, 506
Combinatorial optimization: 383
Concession: 416
Congestion: 87
Congestion pricing: 350
Constrained optimization: 537
Container terminal: 169
Continuum approximation: 87
Courier industry: 116
Crew scheduling: 493
Curfew planning: 506
Cutting plane: 206
Delay management: 307
Distribution network design: 183
Driver rules: 455
Drivers' working hours: 429, 442
Duration constraints: 474
Dynamic programming: 333
Dynamic user equilibrium: 524
Equity: 1
European Community (EC) regulations on driving time: 442
Evolutionary local search: 206
Exact algorithm: 383
Facility location: 183
Freight transportation: 169
Fundamental diagram: 238
Ground delay programs: 1
Heuristic column generation: 455
Highway: 416
Insertion: 193
Integer programming: 291, 307
Integrated supply chain design: 274
Kinematic wave model: 87
Lagrangian relaxation: 38
Large neighborhood search: 455
Local branching: 136
Local search: 291
Location problem: 221
Maritime transportation: 415
Markov decision processes: 333
Markov game: 15
Mixed logit: 537
Monte Carlo sampling: 136
Monte Carlo scenarios: 221
Motorway traffic control: 238
Multiechelon inventory management, Greedy algorithm: 183
Nash equilibrium: 524
Network revenue management: 38
Nonadditive cost models: 63
Nonatomic games: 524
Nonparametric estimation: 537
Optimal control: 238
Optimization: 98
Origin-destination demand estimation: 254
Per-seat on-demand air transportation: 291
Port operations: 98
Priority decisions: 307
Public transit: 382
Railway planning: 493
Ramp metering: 238
Real options: 416
Regulation (EC) No. 561/2006: 429
Resource constraints: 455
Restricted dynamic programming: 442
Revenue management: 15
Robust game theory: 63
Robust optimization: 193
Schedule-based: 350
Scheduled maintenance: 291
Scheduling: 307
SDCARP: 206
Sensor network design: 254
Sequential assignment problem: 333
Shift scheduling: 116
Simulated annealing: 169
Split delivery: 206
Stochastic customer order process: 221
Stochastic demand: 474
Stochastic optimization: 193
Stochastic programming: 1, 221
Stochastic programming with recourse: 125
Stochastic vehicle routing problems: 136
Storage and retrieval scheduling: 169
Strategy: 350
Supply disruptions: 274
Tabu search: 193, 221
Time windows: 455

Timetabling: 506
Track maintenance: 506
Traffic: 416
Traffic counts: 254
Traffic dynamics: 87
Traffic modeling: 151
Traffic stream models: 151
Transit assignment: 350
Transportation: air: 322
Transportation: passenger mortality risk: 322
Transportation: system safety: 322
Transportation network: 524
Transportation problem: 221
Traveling salesman problem: 383
Variable speed limits: 238
Vehicle and crew scheduling: 382
Vehicle routing: 193, 455, 474
Vehicle routing and dispatching: 116
Vehicle routing and scheduling: 442
Vehicle scheduling: 429
Wait-depart decisions: 307
Wardrop equilibrium: 524
Wardrop equilibrium under uncertainty: 63
Yield management: 15
